NAABIDIN GIIZES

Snow Crust Moon

The third moon of creation is the Snow Crust Moon.

It represents a time when spring is approaching, but still separated by many weeks of thawed ice, creating a “crust” of frozen snow atop the ground.

This is a time of reawakening and rebirth. We recognize it as the time of new beginnings. During this moon, we sound out our voices and begin the process of planting the seeds of creation. The snow still covers the earth, but underneath it, we know the world is awakening from its slumber.
