BNAAKWII GIIZES

Falling Leaves Moon

The eleventh moon of creation is the Falling Leaves Moon. Beneath the waning Moon of Falling Leaves, the time approaches to stow away our tools & tend to the garden's winter slumber. When trees relinquish their verdant robes, secrets of summer emerge & nesting birds' sanctuaries are hidden among the boughs.

This season grants a quiet window to prune with care, disturbing not the feathered tenants of the arboreal realm. Should a lifeless tree stand sentinel, it becomes a snag, a refuge for cavity-nesting creatures throughout spring & summer.
